

Coupon Page

The coupon type page allows to include a coupon image in your app which the end user will be able to use (namely show it to the vendor) in order to benefit of a discount, etc.

The coupon image becomes unlocked (displayed on the screen of the device) after end user scans a certain amount of times the QR code printed on your product, or displayed on the screen in your points of sale, etc.

Scanner Page Types		
<input type="radio"/> Barcode Scanner	This page allows users to scan a barcode and see the product information attached to that specific barcode.	tutorial  
<input checked="" type="radio"/> Coupon	This page prompts users to scan QR codes at a specific sales point and take advantage of offered discounts.	tutorial  

The coupon type page allows to include a coupon image in your app which the end user will be able to use (namely show it to the vendor) in order to benefit of a discount, etc.
