

Camera Cover Page

Cover Camera Page is an awesome feature to help your friends, family members, lover and pets become a magazine cover model. You can take a new photo and insert it into a cover template and then email it.

In order to add a new *Camera Cover Page* to your app, go to Edit Pages menu then click the "+" (Add New Page) button. From the list of the page types available select the *Camera Cover* and click the "Create" button.

Once the page is added, you are able to proceed with editing it.

On the right side there are 3 fields that need to be completed. The first one is for setting and email address to which the user will send the photos from the device. (the address can be edited from the device). In the second field you have to indicate how many cover templates you want to have. Finally in the third field you need to link each cover template to a customized image (e.g. magazine template image).

The image shows a side-by-side comparison of a mobile application interface. On the left is an iPhone simulator displaying a camera cover page. The cover features a stylized illustration of a woman's face, the text "LOREM IPSUM" at the top, and "PROIN MOLLIS IMPERDIET" on the left. A green circular button in the top-left corner of the cover says "EDIT MODE" with the instruction "click on iPhone to edit". The simulator's status bar shows "AT&T", signal strength, Wi-Fi, and the time "7:30 PM".

On the right is the web editor interface for "CameraCover.html". It includes a "Save" button and a "Done" button. Below these is a section titled "CameraCover Resources" containing an "Email:" input field and a list of three cover templates: "Cover 1", "Cover 2", and "Cover 3". A "Cover Properties" section below that shows an "Image:" field with "cover1.png" selected. A "NOTE" at the bottom explains that the simulator image is for illustration purposes only and that the actual app has no clickable areas. Red arrows point from the text instructions to the "Done" button, the cover templates list, and the "Image:" field.

EDIT MODE
click on iPhone to edit

NOTE: The page displayed in iPhone/iPod simulator on the left is for illustration purposes ONLY. It is just an image and there are NO clickable areas. Please preview this page using [AppsZero](#) app

link each cover template to a cover image from any directory

Let's see how it works on the device

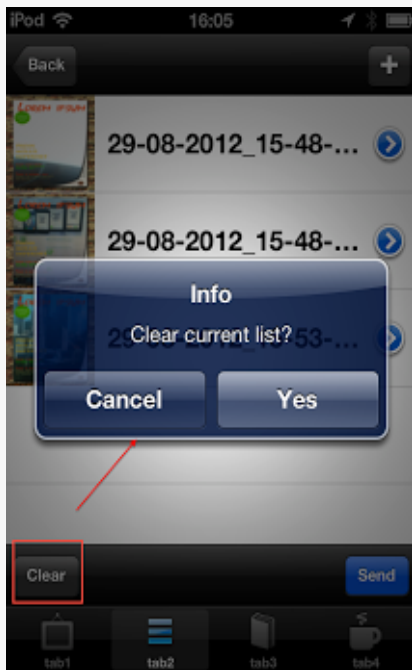

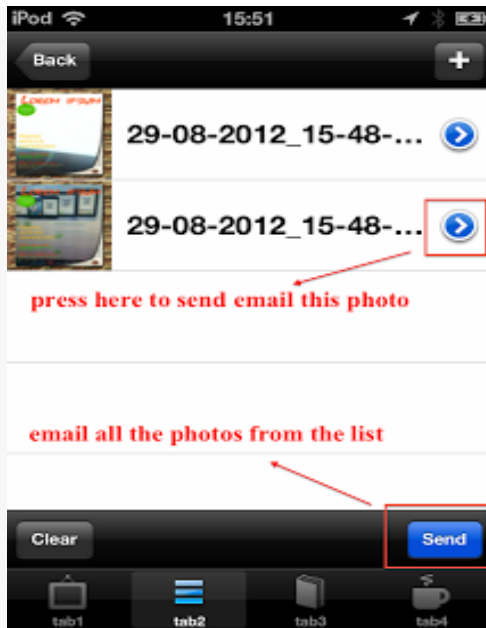

We can see three buttons. Click on the top-right to take a photo

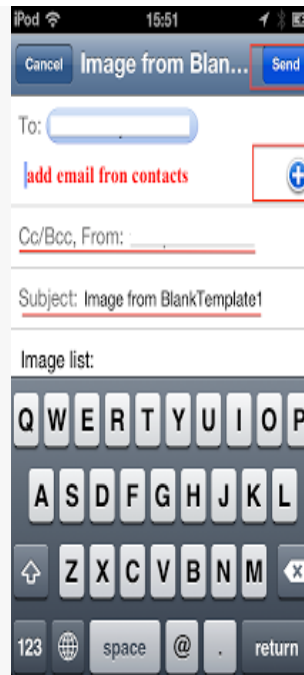

Press take picture to make a photo. After you took the photo, you can change the cover templates clicking on the arrows.

Once you have taken a picture and added a cover image to it, you can email it or delete.

At the "send email" form there are 4 fields. Each can be edited.

****NOTE:** This page can be tested **ONLY** using the AppsZero AppPreviewer application.
