

## Facebook Fan Page Tutorial

The Facebook Fan page asks you to indicate your "Fan Page ID". Where is the "Fan Page ID"? With the help of Andrew, I was able to find out.

First, if you'd like to create a Fan Page, [click this link](#).

Second, after creating a fan page, upon visiting this page, the URL will display both the fan page name and ID:

Example: facebook.com/pages/Mr-Electric-of-Central-Indiana/137409539635096

It is the number portion of the page that is the "Fan Page ID" to use on the App page: facebook.com/pages/Mr-Electric-of-Central-Indiana/**137409539635096**

You can test the usability of the ID by visiting <https://graph.facebook.com/putidhere>

If it **works**, you'll received a code similar to:

```
01 {
02   "id": "137409539635096",
03   "name": "Mr. Electric of Central Indiana",
04   "picture": "http://profile.ak.fbcdn.net/hprofile-ak-snc4/hs224.ash2/50275\_137409539635096\_6060\_s.jpg",
05   "link": "http://www.facebook.com/pages/Mr-Electric-of-Central-Indiana/137409539635096",
06   "category": "Local business",
07   "website": "www.mrelectric.com",
08   "location": {
```

```
09     "street": "P.O. Box 446",
10     "city": "Plainfield",
11     "state": "IN",
12     "country": "United States",
13     "zip": "46168"
14 },
15     "phone": "(317) 838-3000",
16     "likes": 142
17 }
```

If it **fails**, something similar to this should appear:

```
1 {
2   "error": {
3     "type": "OAuthException",
4     "message": "(#803) Some of the aliases you requested do not
   exist: mr-electric-of-central-indiana"
5   }
6 }
```
