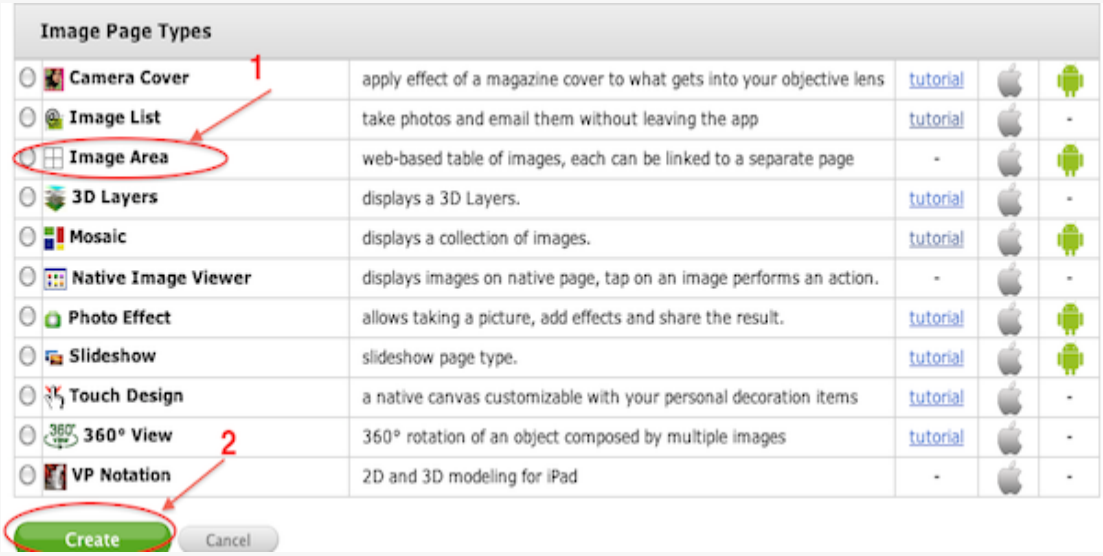
Image Area Page Type Tutorial

The Image Area Page Type is a great way to create a unique / graphic menu for your application.

In order to add a Image Area page type you need to access your Application's Dashboard and go to "Edit pages" section. Click on Add New Page button, the "+" button below the list of the currently available pages.



1- Select the Image Area Page Type

2- Press Create

After retrieving these steps a new Image Area page will appear in your application dashboard.

3 – You can select the number of images per row used in the page

4 – Allows you to modify the header image of the Image Area page

5 – Add/Remove / change order of menu items

6 – Link a certain Image Item to a page from the application

7 – Upload the desired image from the Resource Manager

This is how it looks on a device :
